

Exceptional performance
from local expert.

**Specialist for all services relating to
your equipment park.**

Weiss Technik Mexico is your local partner for environmental simulation systems. Our commitment goes beyond a simple service - we are your trusted supplier and an expert in our field.

Our services:

- ↪ Customised maintenance plans
- ↪ Retrofits and upgrades
- ↪ Calibration according to A2LA standard
- ↪ Installation and repair
- ↪ Local warehouse for spare parts
- ↪ Commissioning and operator training
- ↪ Chamber transfer to your factory in Mexico

Chamber transfer – free of complications

We specialise in the smooth relocation of test chambers to Mexico and Latin America.

Initial diagnosis and repair: we offer a thorough inspection of the condition of the chamber and deal with any problems directly.

Packaging and logistics: safe and professional transport of the chamber.

Provision and commissioning: installation and positioning of the chamber with subsequent commissioning and handover.

Why is Weiss Technik Mexico the right choice for the transfer of your chamber?

Simplified procedure: our service team makes the transfer process smooth and reduces touch points.

Proven expertise: customers benefit from our local network and years of experience.

Minimisation of risks: no delivery of defective systems and no delays caused by state institutions.

Time efficiency: our service reduces implementation times and enables rapid installation.

Pre-suitability check: to be on the safe side, we check whether the chamber fulfils all requirements at the destination before the transfer.

Certified service team

Our local service team specialises in the maintenance, calibration, and repair of your test chambers.

Customer training

Through comprehensive training and support, we help you develop a maintenance plan so that you can maximise your system performance.

Environmental awareness

We emphasise the responsible handling and disposal of operating materials such as refrigerants. For us, complete documentation is a given.

Presence on site

Our local experts in Guadalajara, Queretaro, Toluca, Puebla, and Torreon will be happy to assist you in every phase of the project.

Focus on documentation

Thanks to our holistic approach, you can rely on complete documentation for your system.

Spare parts in stock

Original spare parts with short delivery times thanks to our warehouse management system.
