

**Service is our passion.
Full maintenance**

The all-inclusive package for every requirement

With our full maintenance service, we offer you a customised service package that is specially tailored to your environmental simulation system park. The special features of your processes and test specimens are our top priority.

In addition to all necessary maintenance work, this package includes spare and wear parts, any necessary repairs and all ancillary costs.

Secure comprehensive service for your test systems - all conveniently covered with a single annual flat rate.

Detailed overview of services:

- At least one maintenance per year, per system
- Execution and documentation of all necessary inspections
- Repairs including spare and wear parts
- Disposal of defective components and operating materials
- WKD or DAkkS calibrations by arrangement
- DGUV V3 inspection every 4 years, or more frequently by agreement

We are there for you 365 days a year, 24 hours a day.

Our service technicians are excellently trained specialists. Our service teams are professionally competent and available at all times to provide you with reliable support in a spirit of partnership.

Service from a single source! A partner for all cases.

Supplement your full maintenance package with one of our calibration variants (WKD or DAKKS). The adjustment and recalibration is free of charge for you in combination with our full maintenance.

You benefit from time-optimised processing with short downtimes and predictable costs.

We ensure trouble-free and safe operation of your system!
