

**Service is our passion.**  
**Basic maintenance**

**The foundation for your device  
and system maintenance**

Do you want to keep your test systems in shape?  
Then our basic maintenance is just right for you!

Our team of experts has many years of experience in environmental simulation.  
We ensure that the devices and systems function smoothly and fulfil your operator obligations with regard to the refrigeration system.

Put your trust in our experience and let us take over the maintenance of your test systems.  
We look forward to providing you with the best possible service.

**Inspection by the manufacturer**

The regular training of our employees forms the basis for ensuring that you also benefit from our expertise as a manufacturer when carrying out maintenance work.

**The "basic maintenance" service package includes:**

- Leak test of all refrigerant-carrying components
- Completion of the logbook for refrigeration systems
- Inspection and documentation of the safety devices (pressure switches, thermal protection switches, etc.)
- Functional and visual inspection of the refrigeration/air conditioning system
- Checking control parameters

On request, we also offer our customers this scope of services for the inspection of standard systems from other manufacturers from the environmental simulation.

## We are there for you 365 days a year, 24 hours a day.

Our service technicians are excellently trained specialists. Our service teams are professionally competent and available at all times to provide you with reliable support in a spirit of partnership.

### Service from a single source! A partner for all cases.

Do you want to save time and money as well as being sure that your appliances are in the best hands?

Why not combine basic maintenance with our optional DGUV V3 inspection and cover additional operator obligations.

The electrical safety inspection for fixed installations is mandatory every 4 years.

We will be happy to advise you when your inspections are due!
