

Service is our passion.

RetroFit Relocating your systems

Poor system availability. Logistical challenges.

Constantly changing technical and economic requirements may make it necessary to relocate available test systems to another site.

It is often the case that a test system is located in a different area or test centre than would actually be required.

These include difficult logistics and poor usability of the test system through to complete failure to fulfill the intended purpose of the system

Move now! Optimise your processes!

By moving your testing system to the right location, you can therefore optimise the testing processes and operating costs and use the resources already available in a needs-based and sustainable manner.

We will be happy to assist you reliably and competently with the relocation of your test system. You can therefore benefit from our many years of experience and flexibility in your project.

We are there for you 365 days a year, 24 hours a day.

Our service technicians are excellently trained specialists. Our service teams are professionally competent and available at all times to provide you with reliable support in a spirit of partnership.

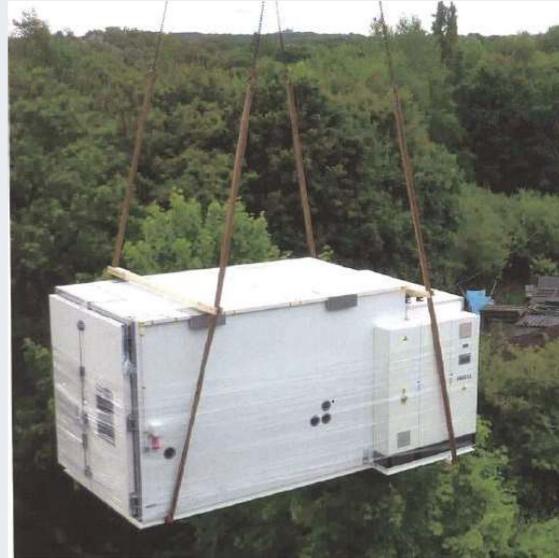

**Competent advice.
Reliable realisation.**

The relocation of your test system from a single source.

We will be happy to advise you on site regarding the relocation of your system to ensure that you can achieve the best possible results with the relocation of your test system.

We are happy to handle all aspects of the relocation process, from advice and planning to transport, installation and commissioning of the system at the new location.
