a schunk company

Innovative climate technology.  
Service that pays.

Passion for Climate.

# Service that adds value. We promise.

**weisstechnik is always there for you. 365 days a year. 24 hours a day.**

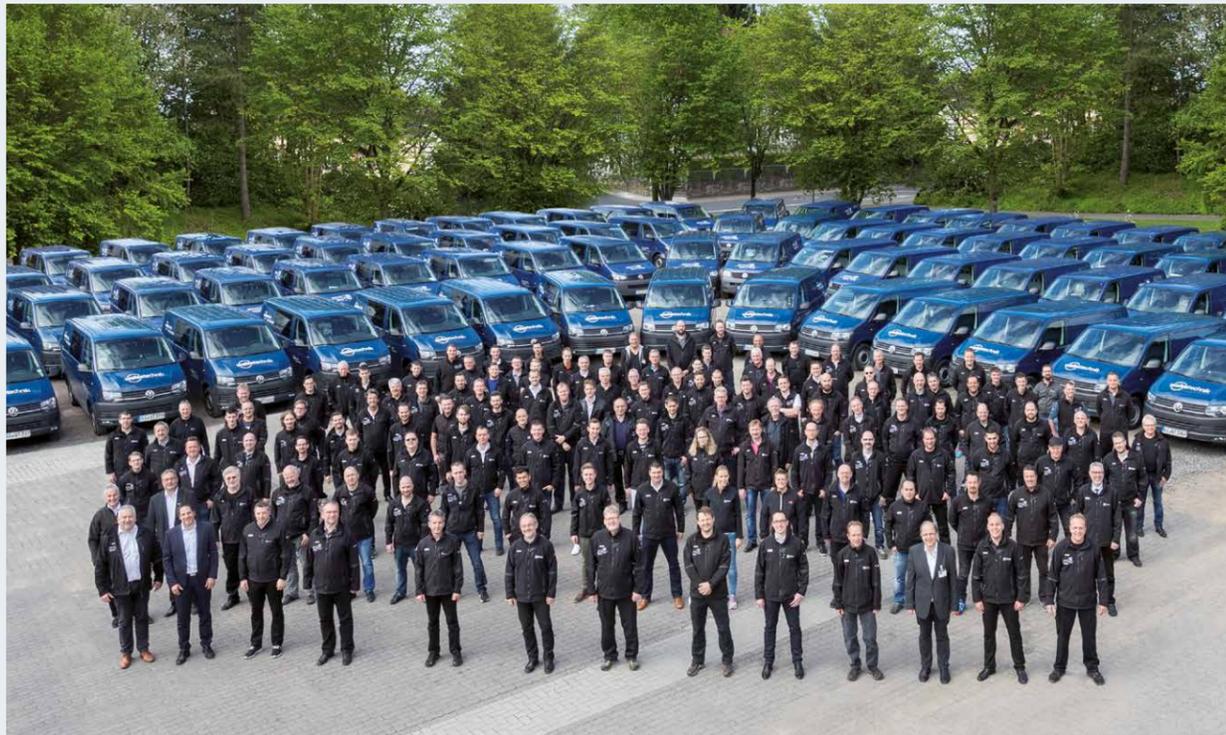

As partner to our Customers, our thinking and acting are always service-oriented. Highly specialised Service Teams offer you customised, sustainable and efficient climate technology solutions for long-term and successful cooperation.

## **Fast. Faster. weisstechnik.**

By continuously expanding our comprehensive service network, we ensure that we are always ready to help you. We offer the fastest reaction times on the market. Over 300 Service Employees are working for our Customers in Germany alone. In the back office of the service organisation, in operational management and on the helpline. A **weisstechnik** Technician is always nearby. Together, this helps us increase the availability of your systems, improve operational safety and lets us reliably plan our services.

## **More competence. More expertise.**

Our Service Technicians for climate systems are highly trained specialists. They can handle all of your relevant needs. From electrical engineering/electronic to refrigeration, control and regulation technology to mechanical and software issues: professionally competent and always available, **weisstechnik** Service Teams offer you reliable support based on partnership.

# Perfectly positioned. Together strong for you.

**A weisstechnik Service Expert is always ready to serve your needs, anywhere in Germany.**

# Using potential energy savings to the fullest.

**weisstechnik offers all-around service to improve the efficiency of your climate system.**

## Optimising systems. Saving energy. Lowering costs.

Using resources carefully and efficiently is essential for today's companies. The best and least expensive energy is the energy you never use in the first place.

Every climate system offers hidden potential energy savings. That's good news for the environment and for your controlling.

With energy inspection services from **weisstechnik**, your ventilation technology can be even more efficient and sustainable. That helps you save cash every day. Try us out - it pays!

## Take advantage of legal requirements.

As the operator of a HVAC system, you are required to identify potential energy savings. Section 12 of the German Energy Saving Ordinance (EnEV) mandates inspections for systems in operation for more than 10 years.

Generate added value from your systems with **weisstechnik** as your Service Partner. We are not only authorised to carry out testing in accordance with the EnEV, we also have the expertise to implement findings from energy inspections in your technology.

## Intelligent optimisation management.

You don't always have to replace your entire system to sustainably save energy. Often, just an energy overhaul of key components is enough to help streamline your system operations.

## We know every brand.

Thanks to our years of experience in system construction, **weisstechnik** can complete energy inspections for systems from other manufacturers, then optimise and maintain the energy components of those systems.

## You can count on us.

To determine amortisation times for your projects, you need a good basis for making decisions. **weisstechnik** can complete the calculations you need based on our energy inspection. You will know quickly whether your planned investment will pay off.

## Find your funding!

Attractive funding opportunities are available to many operators of climate systems looking to improve their energy efficiency. **weisstechnik** is happy to advise you on available funding sources and can help you apply for subsidies as well.

## Call us and save!

Contact us for not binding information on your energy inspection options. We will gladly provide you with comprehensive advising.

# Professional. As partners. Service-oriented.

weisstechnik offers complete solutions for safe, sustainable operation of your systems.

**We measure ourselves by our service!**

**24/7-Service-Helpline:  
+49 1805 666 556**

**Our services - lots of good reasons:**

- Global service network
- Wide selection of preventive maintenance
- Reliable spare part supply
- Special deployments available any time
- Certified proper disposal of outdated devices

Our Service Experts are always near you.

## **Professional consulting.**

Our experienced employees can support you on-site and on the phone during every step of your project, from initial idea to after-sales service.

## **Maintenance and service.**

We offer multiple different service levels and fast reaction times after you report a fault. Our full maintenance service offers additional security with fixed, easy to calculate costs.

## **Replacement parts management.**

Many replacement and wear parts are available directly from our stock. To improve operational reliability even more, selected replacement parts can also be stocked on site. We will be happy to advise you.

## **Education and training.**

We carry out regular training sessions on the use, operation and software for our equipment. Upon request, we can also offer customer-specific workshops for you on site.

# Keeping everything running smoothly.

Our service offers at a glance:

# Passionately innovative.

**We work in partnership to support companies in research, development, production and quality assurance.**  
**With 22 companies in 15 countries at 40 locations.**

**weisstechnik**

**For a safe future.**

## Environmental Simulation

The first choice for engineers and researchers for innovative, safe environmental simulation facilities. In fast motion, our test systems can simulate all the influences in the world as well as for instance in space. In temperature, climate, corrosion, dust or combined stress tests. With a very high degree of reproducibility and precision.

## Air Solutions

As the leading provider of clean rooms, climate technology and air dehumidification, we consistently ensure optimal climatic conditions for people and machines. For industrial production processes, in hospitals, mobile operation tents or in the field of information and telecommunications technology. From project planning to implementation.

## Heat Technology

Experienced engineers and designers develop, plan and produce high-quality, reliable heat technology systems for a broad range of applications from heating and drying cabinets to microwave systems and industrial furnaces.

## Pharmaceutical Technology

With decades of experience and know-how, we guarantee the most sophisticated clean air and containment solutions. Our comprehensive and innovative range of products includes barrier systems, laminar flow systems, safety workbenches, isolators, airlocks and stability test systems.
