

Terms and Conditions

This is a sales promotion campaign operated Weiss Technik UK Ltd, Loughborough Technology Centre, Epinal Way, Loughborough, Leicestershire, LE11 3GE.

The offer is based on the provision of one Fitotron SGC123 plant growth chamber on a free, (no charge) loan basis, with delivery, commissioning and full service included, for one calendar year.

Only universities based in the UK are eligible to enter. The offer is exclusively available to University plant science research laboratories, Directors, Scientists, Laboratory Technicians and R&D students.

The estimated value of the package is £30,000. No cash or monetary alternative.

The university will provide appropriate chamber insurance under their own scheme.

After one calendar year, the chamber will be returned to Weiss Technik (or a purchase option can be discussed).

To qualify to be considered you must complete the application form below.

Your submission will be judged by a team of Weiss Technik specialists. Only one University can ultimately be selected to benefit from this offer.

If your submission is successful, you agree to providing regular reports/white papers on the results and to Weiss Technik publishing these reports as part of an ongoing marketing campaign.

Applicants should complete the following questionnaire and submit it to Weiss Technik UK Ltd by Monday 31st August 2020.

Please answer the following questions - *a maximum of 1500 words is allowed

Q1: Describe the type of research you would be undertaking with the Fitotron SCG123 plant growth chamber. Add any detail that helps Weiss Technik UK Ltd to understand what you would do with this chamber that you currently can't do.

Continue to next page >

Q2: What do you consider to be the unique attributes of Fitotron plant growth chambers and why are they essential to your research? *Note, the Fitotron brochure is available [here as a download](#)

Q3: What plants are you growing? We would consider an unusual plant growth project on its merits of environmental sustainability and/or future food production.
